

# EXCOM CIVIL

INDUSTRY LEADERS IN VACUUM EXCAVATION, PROVIDING PROFESSIONAL SERVICES THROUGHOUT THE HUNTER, LAKE MACQUARIE, CENTRAL COAST, NEWCASTLE, SYDNEY AND BEYOND.

# CAPABILITY STATEMENT

Excom Civil is a trusted specialist in hydro-excavation and utility support services, delivering safe, professional and high-performance outcomes across infrastructure and asset environments.

Our fleet of modern, well-maintained vacuum trucks – operated by highly skilled personnel – ensures reliable and efficient performance on every project. We provide a comprehensive range of vacuum excavation solutions suited to complex civil and utility works.

Our services include:

- Non-destructive hydro-excavation around subsurface assets
- Drain and culvert cleaning
- Stormwater and pipe maintenance
- Pipe repairs and asset rectification works
- Waste removal and disposal in strict compliance with EPA and regulatory requirements

All operators hold full Ausgrid passports and have extensive experience working safely within live electrical environments. Our team is trained in First Aid, CPR, confined space entry, and electrical asset awareness, ensuring full compliance and confidence when working around critical infrastructure.

We are highly experienced in working independently and remotely, mobilising efficiently to regional and interstate locations as required. Excom Civil is fully self-sufficient onsite and accustomed to operating within strict utility, council and principal contractor frameworks.

Operating under a certified ISO management system, we maintain the highest standards in quality, safety and environmental performance. We also provide 24-hour availability to support programmed works, shutdowns and emergency response requirements.

**Excom Civil is committed to supporting clients with safe, compliant and dependable vacuum excavation and utility services wherever required.**

## WHAT WE PROVIDE.

We work on a wide range of job sites and project sizes, with our team able to deliver outstanding results in any terrain. Along with our expertise and advanced equipment, we offer a personal approach to customer service.

At Excom Civil, we offer safe, reliable, and affordable vacuum truck hire services. Furthermore, we offer non-destructive digging (NDD), utility service locating and other residential, building, and civil construction services.

Excom and Vactruck Solutions have provided services to many companies such as Ausgrid, Cleanaway, JR Richards, Abergeldie, Robson Civil, Interflow, Daracon, local councils and Hunter Water. Examples of some of our projects are the Parramatta Light Rail, V8 Supercars in Newcastle, road widenings for the RMS, Opal papermill shutdowns and various council projects in the Hunter area.

## WHAT MAKES US DIFFERENT?

Excom Civil vehicles use a high-velocity vacuum system, providing an effective non-destructive digging solution. The system's high-pressure water lance breaks up the ground which gets sucked out by a powerful hose. Essentially, it won't break or suck up any vital services.

Not only is it a safe and cost-effective method, but ensures the protection of subsurface assets and the natural environment. With little danger and no potential harm to those services, non-destructive excavation services can be performed close to and around water networks, telecommunications, power or gas lines.

## OUR MISSION.

Our mission is to prioritise the delivery of excellent service, accommodating to each individual client and project. We are committed to exceeding our customer's expectations rather than just meeting them.

We pride ourselves on having the agility and responsiveness of a private company, however providing industry-leading machinery with highly-professional service delivered by experienced and friendly operators.

# HYDRAULIC EXCAVATORS & TIPPER TRUCKS

ITEM	ATTACHMENTS	DETAILS
<b>3.8 TONNE EXCAVATOR</b>	Tilt Hitch, Mud Bucket, full set of digging & plated buckets.	Case zero swing with full pivot main boom.
	Augers - 300, 450, 600mm	
	Ripper tyne	
	Compaction Roller	

<b>5.5 TONNE EXCAVATOR</b>	Tilt Hitch, Mud Bucket, full set of digging & plated buckets.	Takeuchi or Hitachi (tilt hitch).
	Hydraulic Hammer	Hyd Grab
	Augers - 300, 450, 600mm	
	Sieve/recycling bucket	
	Ripper Tyne	
	Hydraulic Diamond rock saw	
	Compaction Roller	

ITEM	ATTACHMENTS	DETAILS
<b>8.0 TONNE EXCAVATOR</b>	Mud Bucket & full set of digging buckets.	Kobelco
	Hydraulic Hammer	
	Augers - 300, 450, 600mm	

<b>ACCESORIES</b>	Siev/Recycling Bucket.	
	Ripper Tyne	
	Hydraulic Diamond Rock Saw	Capable of 750mm deep cuts.

<b>BOBCAT (TRACKED LOADER)</b>		New Case CX270 with tilting/adjustable 4in1 bucket- LARGE SIZE
	Pallet Forks attachments	

<b>TIPPERS</b>		
<b>3 TONNE CAPACITY</b>		
<b>6 TONNE CAPACITY</b>		
<b>8 TONNE CAPACITY</b>		
<b>14 TONNE CAPACITY</b>		

# LIQUID TRANSFER BINS FOR HIRE

In today's modern world, effective Liquid Waste Disposal has never been more critical. With the harsh penalties for improper disposal methods, it pays to rely on the experts for your onsite waste disposal.

We are proud to introduce our brand-new Liquid Transfer Bins, which represent a significant asset to our operations. Each bin has a capacity of 12,000 liters, allowing our tankers to efficiently offload excess waste onsite. This innovation significantly reduces downtime and enhances efficiency for our clients. We have two bins available for rental at \$800 per week.

ITEM	DETAILS	FLOAT/TRAVEL
LIQUID WASTE TRANSFER BIN (2 available).	Each bin has a capacity of 12,000 litres.	Subject to location of delivery.

## PLEASE NOTE:

\*Travel for this plant is depot to depot, with an additional ½hr charged for “tip & clean” at our depot for the final load of the day. This only applies if plant is not cleaned out onsite or if plant is returned to base with a load for disposal. Some special arrangements can be made for repeat higher volume customers in reducing travel cost.

\* Overtime rates apply after 8 hours of Normal time or outside Normal working hours (Nightshift)

- All works to be carried out under head contractor supervision, direction & risk. All care, but no ultimate responsibility taken for damage to services for periodic wet hire arrangements

- Tipping of vac truck load(s) & return to site to continue work within normal “on site” hours is considered normal hire. I.E, no “downtime” during tipping & return to site time period(s)

- Combination rates, multiple machine hire, additional manpower etc. Please call for very competitive rates.

- Dry hire of most machinery is available. Please call for very competitive rates

- All machinery is equipped with SWMS, Risk Assessments & First aid box

- 30day/end of month payment terms apply

- No allowance made for retention sums or Liquidated damages clauses.

- No allowance for Soil testing or VENM certification. If required price on application.

- All Traffic Control & environmental controls are implemented by the client. Rates apply to machine hire only.

- All hours worked on site to be agreed on site at day's end & signed off by Excom operator & hiring agent supervisor.
